Council to Begin Meeting in New Chambers

City Staff has announced that beginning October 28th, City Council will begin meeting in the renovated 1931 Old City Hall on the corner of East Third Street and Main. The City began rehabilitation of the building in 2018 after the Capital Improvement Program Committee identified the need for an improved Council Chambers and meeting space in 2014. "It's been a long process, but we now have a facility that we can be proud of, and that can be used by Boards and Committees, as well as community groups, for the next 50 years" said Finley deGraffenried, City Manager. City Council Chambers and two meeting rooms are located on the second floor, and a large training and meeting room is located on the first floor. At this time, the City has not determined how the basement of the Old City Hall will be used.

In addition to City Council meetings, the facility will be used by the Planning and Zoning Commission, Lampasas Economic Development Corporation, Board of Adjustment, Construction Board, and Park Board. The City is planning a formal Community Open House and Dedication this December.
