

### **Stage 3 Response -- SEVERE Water Shortage Conditions**

**Target: Achieve a 20 percent reduction in total water use or daily water demand.**

#### Best Management Practices for Supply Management:

The City will manage limited water supplies and/or reduce water demand by flushing of water mains only as needed, limit irrigation of parks to hand held hose or alternate water source, increase enforcement of watering schedule and water waste, and public notification of Stage 3 Water Use Restrictions.

#### Water Use Restrictions for Demand Reduction:

All requirements of Stage 2 shall remain in effect during Stage 3 except:

- (a) Irrigation of landscaped areas shall be limited to **Thursdays** for customers with a street address ending in an even number (0, 2, 4, 6 or 8), and **Tuesdays** for customers with a street address ending in an odd number (1, 3, 5, 7 or 9), and irrigation of landscaped areas is further limited to between the hours of 10:00 p.m. and 8:00 a.m. on designated watering days.
- (b) The use of water for construction purposes from designated fire hydrants under special permit is to be discontinued.
